Federico Fuffa

Junior Web Developer

CITY Matelica (MC), Italy
EMAIL federicofuffa@outlook.it
PEC (CERTIFIED EMAIL) federico.fuffa@mpspec.it
PORTFOLIO federicofuffa.it

PROFILE

Junior web developer focused on front-end. I build responsive websites with HTML, CSS, JavaScript and Astro, with attention to SEO and performance, and I also handle deployment: production builds, hosting, DNS and server configuration. I am looking for a junior Web Developer position, open to full-stack roles, where I can grow within a team.

TECHNICAL SKILLS

FRONT-END

HTML5 · CSS3 · JavaScript · Astro · Responsive Web Design · UI/UX

BACK-END & DATABASE

Node.js · Nodemailer (SMTP) · Form validation · MySQL

INFRASTRUCTURE & DEPLOYMENT

Git · GitHub · GitHub Pages · Linux (Debian, WSL) · DNS · Cloudflare (Tunnel) · Production builds

SEO & PERFORMANCE

Meta tags · Heading structure (H1) · Minification and optimization of code and images · Google Search Console · Analytics · Accessibility

CURRENTLY LEARNING

Java · PHP · C++

PROJECTS

Boarelli Automazioni – Company Website & Self-Hosted Infrastructure

Launching soon

Front-end, back-end and infrastructure development · Client project

Astro · JavaScript · Node.js · Nodemailer · Debian 12 · Cloudflare Tunnel

- Built the company website: responsive front end and a Node.js back end with a contact form that forwards requests to the company mailbox via SMTP.
- Set up a self-hosted Debian 12 server, managed the domain's DNS and published the site through Cloudflare Tunnel, with baseline security measures for the infrastructure and web service.
- SEO optimization and production build.
- Back end written by me under the guidance and technical approval of a DevOps Engineer with 10 years of experience. Demo material available on request.

Boarelli Automazioni – Invoicing & Client Management System

In progress

Business management software development · Client project

MySQL

- Management system for the company's invoicing and client management; database design and creation are currently in progress.

Diiamoond – Website for a Music Producer

diiamoond.live

Front-end development and visual identity · Live site

Astro · JavaScript · HTML · CSS

- Designed the page architecture and developed the responsive front end, with sections for discography, productions and multimedia content, plus custom components.
- Optimization for desktop and mobile, graphic asset management, SEO and production build.
- Designed the new logo and integrated it into the site's visual identity.

Studio Optometrico Nicastro – Professional Website Launching soon

Front-end development · Client project

Astro · JavaScript · HTML · CSS · Google Search Console · Analytics

- Built the website for an optometry and vision therapy practice: content architecture, responsive interface, UI/UX and communication tailored to the target audience.
- Accessibility, performance and SEO: meta tags, heading structure (H1), code and image optimization, search engine indexing. Demo material available on request.

EXPERIENCE

Halley Informatica S.r.l. Oct 2026 – present · Matelica

Programmer

Halley Informatica S.r.l. 4 weeks · Matelica

Work-Placement Internship (PCTO), Programming Department

- School-to-work placement programme at a software house.
- Training course attended alongside new hires, with an introduction to the proprietary language HBL (Halley Business Language).

EDUCATION

Upper Secondary Diploma in Administration, Finance and Marketing

Business Information Systems track · IIS Varano Antinori, Matelica

2020 – 2025 · Grade: 100/100
